

## **Product Data Sheet**

Updated : May 2004 Supersedes : June 2003

## **Product Description**

4611F is a dark grey double coated acrylic foam tape with a high tack acrylic adhesive. This tape has a plain red filmic liner. The excellent temperature performance enables bonding of materials prior to processing in a powder coating line

Physical Properties Not for specification purposes	Adhesive Type	Acrylic	
	Foam Core	Acrylic	
	Thickness (ASTM D-3652)		
	Таре	1.1 mm ± 0.1mm	
	Release Liner	Red Filmic	
	Tape Colour	Dark Grey	
	Foam Density	840 kg/m³	
	Shelf Life	24 months from date of despatch by 3M when stored in the original carton at 21°C (70°F) & 50 % Relative Humidity	

Performance Characteristics Not for specification purposes	Peel Adhesion to Stainless Steel 90° peel @ room temp, 72 hr dwell, jaw speed 300mm/min AFERA 4001 (modified)	32 N/10mm	
	Static Shear Strength weight held for 100 hours to stainless steel with ½ sq in (3.23 sq cm) overlap	1000g @ 20°C 500g @ 70°C	
	Temperature Performance Continuous Intermittent	120 °C 230 °C	

Date : May. 2004 VHB Acrylic Foam Tape 4611F

Additional Product Information	This product is suitable for plasticised PVC but is not suitable for low surface energy plastics.		
Application Techniques	<ol> <li>Bond strength is dependent upon the amount of adhesive-to-surface contact developed. Firm application pressure develops better adhesive contact &amp; thus improves bond strength.</li> <li>To obtain optimum adhesion, the bonding</li> </ol>	surfaces must be clean dry and well unified. A typical surface cleaning solvent is isopropyl alcohol & water. Use proper safety precautions for handling solvents. 3. Ideal tape application temperature range is 20°C to 40°C.	Initial tape application to surfaces at temperatures below 10°C (50°F) is not recommended because the adhesive becomes too firm to adhere readily. However once properly applied low temperature holding is generally satisfactory.
Applications	4611F is a high performance double coated acrylic foam product which possesses a good balance between shear peel and high tack adhesion. It has been designed to be suitable for a range of bonding applications which require a level of adhesion higher than standard double coated foam tapes but perhaps lower than higher performance 3M VHB <sup>™</sup> tapes.	<ul> <li>Typical applications include:</li> <li>Bonding roof bows on trucks and buses.</li> <li>Bonding glazing (muntin) bars or muntin bars positioned internally.</li> <li>Signage applications.</li> </ul>
